Andy,

25X1

I have been checking on contractors who can be used in connection with [] as you requested. [] has a business office in Washington; however, no one there is cleared. One person in the [] office was cleared in 1953, [] who didn't even know he was cleared and has never been approached. We don't even know if he is still with the company. The Agency has never had anything classified with this company according to what I can find out, but it wouldn't take much to have them cleared since we have been doing business with them in the past.

I talked with [] about this and there is a small outfit in [] an affiliate of [] this company may possibly be able to do what you want. According to [] most of their work has been on electronic devices. [] suggests that you talk to him in regard to what you want them to do and he will be glad to help you out as he knows them quite well. It wouldn't take much time to get these people cleared if you are interested.

Another thought I had was [] which is now [] [] had at one time requested a basic task type contract with this outfit which was cancelled in December 1957 because [] who had been at [] did not go there as intended. [] has a TS clearance and was the contact man there at [] Possibly you could get this outfit to do what you want.
